18	cd-player/keyb/fx rig	mono di active
19	backing vocal	sm 58
20	lead vocal	sm 58
21	spare vocal	

**opmerkingen**

>> drummer is left handed. monitor on his right side.

band's drumkit cannot be used by other bands

bass player operates 2 ch cd-player: ch 1 is a clicktrack going into a headphone amp wired to drummer, wireless to bass player; ch 2 is a backing track submixed with synth/keyb/fx etc - going into to one mono active di to stageblock.

lead vocal needs lush delay (ca. 300 ms, multiple repeats), less on backing vocal.
